Port Laredo now wears the crown as *nation's No.1 port*

President's Note

Ken Roberts

Now that Port Laredo is the nation's No. 1 ranked "port," having conducted more trade in 2023 than any U.S. airport, seaport or border crossing ever, here's the question: Will it be No. 1 for the foreseeable future? The short answer is, I think so.

A little background first.

Port Laredo's trade grew 7.20 percent to \$319.91 billion in a year when U.S. trade fell 3.89 percent and trade fell at eight of the top 10 ports. Port Laredo exports jumped 6.55 percent to \$123.18 billion and imports increased 7.61 percent to \$196.73 billion. Both are personal records for Port Laredo, but neither is a national record.

Similarly, Port Laredo's deficit was the highest it has ever been, at \$73.54 billion, and more than double what it was just five years ago. That comes with growing trade; Port Laredo trade has grown 36.98 percent over the last five years, almost triple the national average.

Another yardstick, albeit a slow-moving one, looks at the percentage of total trade that is an export. With Port Laredo, exports accounted for 39 percent of its total trade for the third time in the last four years, slightly below the national average of 40 percent, but did stand at 43 percent five years ago.

Another way to look at Port Laredo's strength is its ranking among all ports for its top exports and imports. Port Laredo ranks first in the nation for 17 of its top 25 exports. It ranks second or third for another four. For 16 of its top 25 imports, it ranks first in the nation. Similarly, it ranks second or third for another four.

Now to the question. If another port were to strip Port Laredo of its crown, which port would it be and what might precipitate it?

The two most obvious ports are the Port of Los Angeles, which ranked No. 1 for decades and second in 2023, and Chicago's O'Hare International Airport.

For the Port of Los Angeles to surpass Port Laredo, it would take a swing of about 10 percentage points from 2023 numbers. In other words, if Port of Los Angeles trade increased 6 percent, Port Laredo would need to drop 4 percent. Not impossible but the import tariffs former President Donald Trump placed on China, tariffs which President Biden kept, have led to supply chain shifts that cut U.S.-China trade almost 30 percent in the last five years.

O'Hare, like the Port of Los Angeles, is dependent on China trade, though less so. It also conducts a great deal of trade in the pharmaceutical and medical device categories. For O'Hare to pass Port

Laredo, the swing would have to be about 19 percentage points.

The next three top-ranked ports, JFK International Airport, the Port of Houston and the Port of Newark, aren't particularly likely to do so, even in the medium term, with the possible exception of the Port of Houston. Its trade tends to swing as wildly as any top port, given its great reliance on energy trade. The trade differential, however, would have to be about 42 percentage points.

What about Port Laredo? What could negatively affect its trade?

It would have to be steep decline in its trade with Mexico, of course. That would mean either a steep decline in Mexico's trade with the United States or a steep shift in Mexico trade to other border crossings. I don't see the first happening – without China's previous might, what nation would fill the gap – and the second would only happen if another port had the bridge capacity Port Laredo is building and the highway infrastructure to which truckers using Port Laredo have access. I don't see it.

The problem with so many predictions is seeing the unforeseeable. Failing that, failing some unforeseen event, Port Laredo will likely wear the crown as the nation's No. 1 port for years to come.

our products

WorldCity has been producing TradeNumbers publications since 2001 for airports, seaports and border crossings across the United States. They are published annually in three formats: the Executive Summary format, a full 64-page magazine format, and a handy pocket-sized version. WorldCity also hosts a website, ustradenumbers.com, updated monthly with pages of data for more than 200 countries, more than 1,800 specific export and import commodities, and more than 450 airports, seaports and border crossings. WorldCity licenses its content to airports, seaports and border crossings, updated monthly, including Eagle Pass. Data for those ports is also "unlocked" and available to all at ustradenumbers.com.

Getting started: a user guide for these pages

The source for all data is the U.S. Census Bureau, as analyzed by WorldCity.

THE HEADER tells you:

- 1 Export or import being analyzed.
- 2 Its 2023 rank with Port Laredo.
- 3 Total trade in that commodity, 2023.

THE SUMMARY tells you:

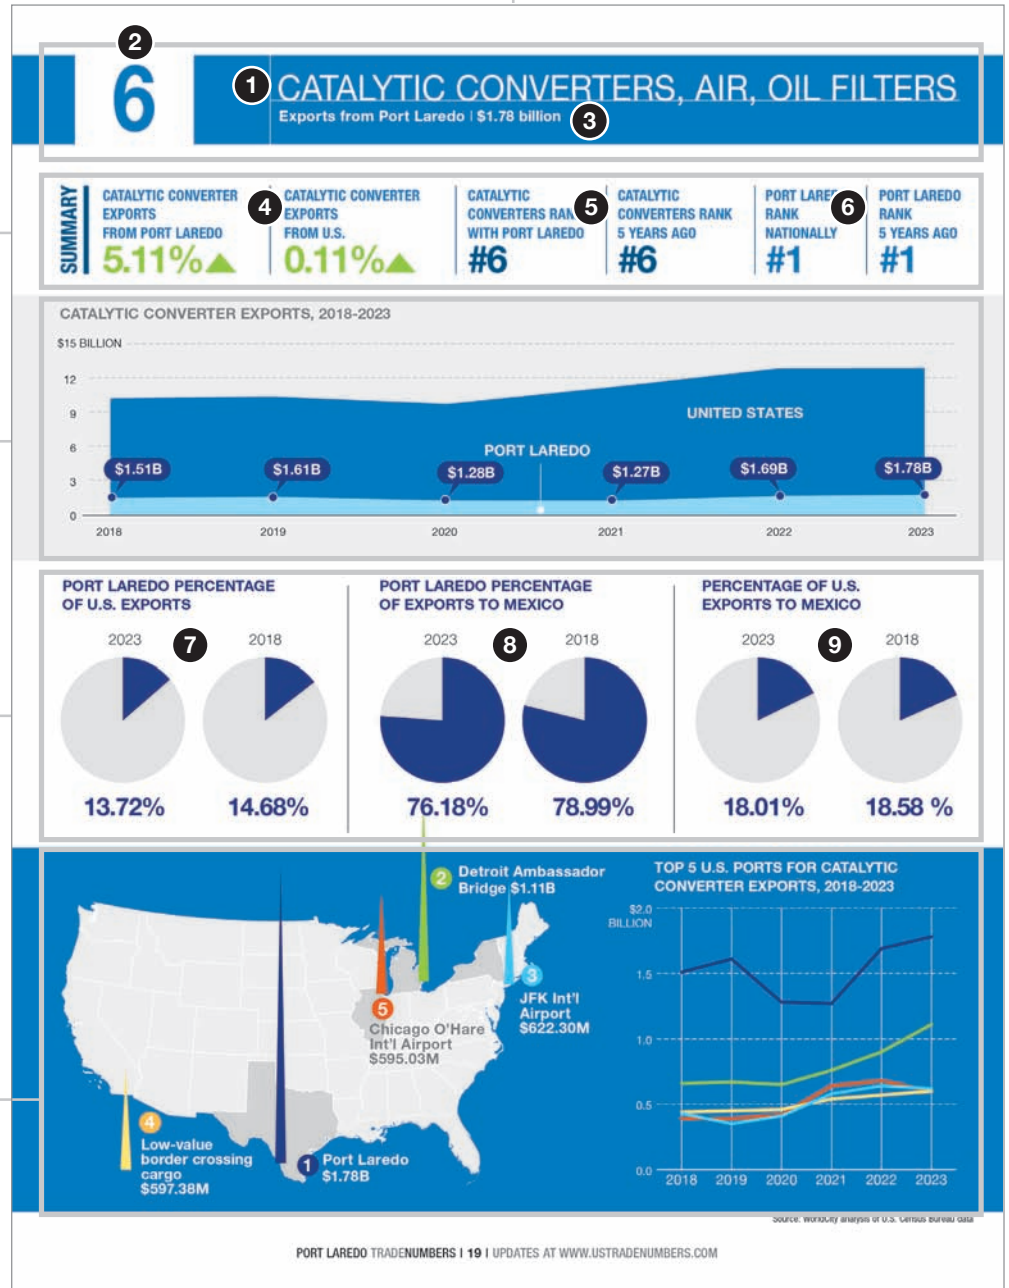

- 4 Change in value from 2022 to 2023.
- 5 How important it was and is in Port Laredo.
- 6 How important Port Laredo was and is to the U.S. for the commodity.

TOTAL TRADE is shown for Port Laredo from 2018-2023, relative to the U.S. in this commodity.

MARKET SHARE shows:

- 7 The percentage of this commodity crossing through Port Laredo relative to other U.S. airports, seaports and border crossings.
- 8 The percentage of Mexico trade in this commodity crossing through Port Laredo.
- 9 The percentage of Mexican trade relative to the U.S. total.

PORTS COMPARISON shows where Port Laredo stands relative to other U.S. airports, seaports and border crossings in this commodity.

PORT LAREDO RANKS NO. 1

The Port of Los Angeles had been the perennial No. 1 but Port Laredo surpassed it in 2023 due to trade that is far more balanced, as the pie charts show. The Port of Houston's exports ranked first but its imports paled when compared to Port Laredo's.

	Exports	Imports	Total Trade	Trade Balance
Port Laredo	\$123.18B	\$196.73B	\$319.91B	39%
Port of Los Angeles	\$32.89B	\$259.18B	\$292.06B	11%

12 GAIN MORE THAN 10 PERCENT

Twelve of Port Laredo's top 15 exports increased more than 10 percent over the 2022 total, led by big percentage gains in copper and passenger vehicles, shown on the far left in the chart. The biggest gain in dollar terms, however, was with the most valuable export, motor vehicle parts – the large blue circle – which increased more than \$2.7 billion.

For the third consecutive year, Port Laredo exports set a record, increasing \$7.57 billion over the 2022 record and topping \$100 billion for the second consecutive year.

With a \$123.18 billion total, Port Laredo narrowly missed being the nation's leading port for exports, falling just shy of the Port of Houston, with \$124.02 billion.

Laredo International Airport

EXPORTS HAVE THIRD RECORD YEAR

Laredo International Airport set its third consecutive record year for exports in 2023, with a \$57.57 million increase over the 2022 total. While the rest of this publication includes land-based cargo, including truck and rail, it does not include LIA air cargo. While the land-based cargo dwarfs the air cargo, LIA nonetheless plays an important role, including “just in time” logistics. For example, while land-based exports

of the category that includes civilian aircraft parts fell \$400.84 million, those exports increased \$109.93 million from LIA. Those exports represented 28.14 percent of all exports in 2022, then a record, but jumped to 52.47 percent in 2023. When the airport's exports in the category are combined with Port Laredo land-based shipments, LIA accounted for 16.94 percent of the total, the most since 2015.

IMPORTS TUMBLE FROM RECORD YEAR

Airport imports tumbled 55.43 percent in 2023, on the heels of an almost 60 percent surge in 2022. The \$312.46 million total is the third-greatest year on record, trailing only the \$701.09 million total in 2022 and the \$441.04 million total in 2021. Three airport imports fell more than \$100 million in 2023, with two of the three registering even greater gains in land-based cargo at Port Laredo and the third nearly

doing so. This points to a better supply-chain environment or management. Not all imports fell, of course. Cell phone reception equipment, cell phones, etc. increased 20.49 percent from the 2022 total and ranked as the most valuable import. Engine parts grew 872.34 percent, from \$682,992 to \$6.64 million. And the seats category increased from \$991,147 to \$3.92 million.

2023 | **PACE OF CHANGE**
TOP 25 IMPORTS

14 GAIN MORE THAN 10 PERCENT

In 2023, 14 of its top 25 imports increased more than 10 percent from the 2022 total, led in percentage terms by aircraft engines and parts; electrical boards, panels and switches; and the other imports on the left in the chart below. In dollar terms, Port Laredo's top import, motor vehicle parts – the large circle in the middle – increased the most, up \$3.46 billion.

Port Laredo's imports into the United States rose a robust \$13.92 billion in 2023, nearly reaching \$200 billion on the way to its third consecutive record year.

The total also marked a 57.27 percent rebound since the pandemic-influenced 2020, more than 75 percent faster than the national average.
